

Docket No.: ACONT.0101C1

Patent

In The Claims:

Please cancel claims 1-15 without prejudice.

16 A method of selling a quantity of electrical energy between at least two participants, said method comprising the steps of:

- (a) connecting a first participant to a database display;
- (b) connecting a second participant to the database display;
- (c) displaying a price for the quantity of electrical energy;
- (d) consummating a transaction between the participants for the quantity of electrical energy; and
- (e) curtailing the transaction between the participants.

17. A method of selling a quantity of electric energy between at least two participants, said method comprising the steps of:

- (a) connecting a first participant to a database display;
- (b) connecting a second participant to the database display;
- (c) displaying a price for the quantity of electrical energy; and
- (d) displaying a reliability indicator associated with any offer to sell electric energy.

18. A method of selling a quantity of electric energy between at least two participants, said method comprising the steps of:

- (a) connecting a first participant to a database display;
- (b) connecting a second participant to the database display; and
- (c) displaying a price for the quantity of electrical energy for next hour offers;
- (d) displaying the next hour offers during the current hour; and
- (e) stopping the consummation of next hour transactions at a predetermined time during the current hour.

Docket No.: ACONT.0101C1

Patent

Please add the following new claims:

- 4
19. A method for facilitating the trading of units of electrical energy in a data processing system, the method comprising the computer-implemented steps of:
- (a) receiving an offer to buy a quantity of units;
 - (b) receiving an offer to sell a quantity of units;
 - (c) storing a list of transaction conditions wherein said list comprises:
 - (i) a parameter associated with a quantity of units that can be physically delivered wherein said parameter is a limit on an electrical energy unit transmission capacity;
 - (ii) a parameter associated with a contractual agreement between at least one or more buyer and seller participants; and
 - (d) facilitating a trade transaction for units of electrical energy if transaction conditions are satisfied.
- 5
20. The method of claim 19 further comprising:
4
(e) curtailing the trade transaction between transaction participants.
- 6
21. The method of claim 19 further comprising:
4
(e) computing a performance index associated with the trade transaction.
- 7
22. The method of claim 21, wherein computing the performance index for the trade transaction is based upon a performance index associated with a buyer, a seller, or a wheeler.
- 6
23. The method of claim 22, wherein a performance index for a party to a transaction is based upon historical transaction data.
- 9
24. The method of claim 19 further comprising:
4
(e) determining a path of delivery of said units through a wheeler for said trade transactions.

42

Docket No.: ACONT.0101C1

Patent

¹⁰
~~25.~~ The method of claim ⁴~~19~~ further comprising:
(e) informing a buyer and a seller of a consummation of the trade transaction.

¹¹
~~26.~~ The method of claim ⁴~~19~~ further comprising:
(e) clearing a payment obligation for the trade transaction through an electronic settlement process.

¹²
~~27.~~ The method of claim ⁴~~19~~ further comprising:
(e) informing a buyer and a seller of a scheduling obligation for the trade transaction.

¹³
~~28.~~ The method of claim ⁴~~19~~ wherein step (c) (i) is stored if the buyer and seller are at different points.

¹⁴
~~29.~~ The method of claim ⁴~~19~~ wherein step (c) (i) is not stored if buyer and seller are at the same point.

¹⁵
~~30.~~ The method of claim ⁴~~19~~ wherein step (c) (i) is not stored if the units are at the same point.

¹⁶
~~31.~~ A data processing system for use in facilitating the trading of units of electrical energy in a data processing system, the system comprising:

- (a) means for receiving an offer to buy a quantity of units;
- (b) means for receiving an offer to sell a quantity of units;
- (c) means for storing a list of transaction conditions wherein said list comprises:
 - (i) a parameter associated with a quantity of units that can be physically delivered wherein said parameter is a limit on an electrical energy unit transmission capacity;
 - (ii) a parameter associated with a contractual agreement between at least one or more buyer and seller participants; and

transaction conditions are satisfied.

17
32.

16

The system of claim 31 further comprising:

(e) means for curtailing the trade transaction between transaction participants.

18
33.

16

The system of claim 31 further comprising:

(e) means for computing a performance index associated with the trade transaction.

19
34.

18

The system of claim 33, wherein computing the performance index for the trade transaction is based upon a performance index associated with a buyer, a seller, or a wheeler.

20
35.

18

The system of claim 33, wherein a performance index for a party to a transaction is based upon historical transaction data.

21
36.

16

The system of claim 31 further comprising:

(e) means for determining a path of delivery of said units through a wheeler for said trade transactions.

22
37.

16

The method of claim 31 further comprising:

(e) means for informing a buyer and a seller of a consummation of the trade transaction.

23
38.

16

The method of claim 31 further comprising:

(e) means for clearing a payment obligation for the trade transaction through an electronic settlement process.

24
39.

16

The method of claim 31 further comprising:

(e) means for informing a buyer and a seller of a scheduling obligation for the trade transaction.
